

SMART CAR PARK SOLUTIONS

Making cities smarter and better

About Keytop

Keytop is devoted to let our cities smarter and better. With more than 15 years experience in smart car park industry, Keytop enables deliver easy carpark management and maximize carpark revenue for operators, meanwhile improve the parking experience for drivers.

Keytop always would be the leader in the industry, welcome to see who we are and how we are different.

Centralized Control Centre

Able to manage multiple car parks at central control centre.

Enhance the efficiency of manpower at operation point of view.

Ticketless Parking System

License Plate Recognition Technology provides an alternative for access control at entrance and exit.

Enhanced the efficiency on managing the monthly parking licenses with several vehicles registered.

Better user experience from faster finishing the entrance and exit access control.

Parking Guidance & Car Search System

By camera based parking sensors to monitor each parking space, able to provide parking guidance information to the signage and car searching at the kiosk or mobile.

Sensors would have 7x24 video recording to NVR system for surveillance purpose.

60+ COUNTRIES WITH KEYTOP SOLUTIONS
